Book Condition: New. Publisher/Verlag: Springer, Berlin | IFIP TC8 & TC9 / WG8.2 & WG9.4 Working Conference on Information Systems Perspectives and Challenges in the Context of Globalization June 15-17, 2003, Athens, Greece | Organizational Information Systems in the Context of Globalization exemplifies the role of social theory in approaching ICT utilization challenges in a globalization context. The debates raised on implementation, policy, organizations and organizing, and social dynamics, increase our awareness of the diversity of perspectives we need to delve into when framing the role of ICTs in the globalization agenda. The equal representation of managerial and non-managerial decision making contexts alerts us to the fact that ICTs should not be considered only as a corporate wealth creation prerogative. This book contains the selected proceedings of the Working Conference on Information Systems Perspectives and Challenges in the Context of Globalization, sponsored by the International Federation for Information Processing (IFIP) and held in Athens, Greece in June 2003. | Acknowledgements.
