Lawrence Erlbaum Associates Inc, United States, 1996. Hardback. Book Condition: New. 231 x 160 mm. Language: English . Brand New Book. This is a very unusual book. The chapters contributed by contemporary scientists mirror Bernstein s style and present new findings in the areas of biomechanics, motor control, and motor development in a way that would be both understandable to non-specialists in these areas, and informative for professionals working in different areas related to human movement. All those interested in the origins and mechanisms of the production of voluntary movements, irrespective of their educational and professional background, will find this...
