Of course the farmer can protect himself in this respect if he will, by taking note of the guaranteed composition of the stock which he buys. Hicks mixture cost more than it should. By the use of a cheaper form of phosphoric acid equally good results might have been obtained that season at less cost. In the formulas above given it will be noticed that muriate and sulphate of potash were both used, and some farmers are of the opinion that a combination of the two forms is desirable for potatoes. It is well known that chlorine lowers the quality of potatoes, and the chlorine is introduced in the muriate of potash. High grade sulphate of potash produces potatoes of...
